

Infant RSV Immunization Clinic

Improving Access for Infants Born Outside of RSV Season

Toronto RSV catch-up clinic

The Asāla Medical Clinic is offering an RSV immunization clinic–Beyfortus (Nirsevimab)–for babies who missed the immunization.

Eligibility

- ✓ Babies born after April 1, 2025 who did not receive Beyfortus in the hospital at birth

Clinic Details

Dates

October and November, 2025

Location

Asāla Medical Clinic
96 Roncesvalles Ave,
Toronto, ON

This clinic will be open to anyone in the area who requires this immunization. It is especially important for those without access to a primary care provider, or whose primary care provider is not offering Beyfortus for babies born outside of RSV season.

How does the catch-up clinic work?

1. Patients can scan the QR code/visit the link to see available clinic dates in October and November
2. Follow the prompts to select a preferred day and time for their appointment
3. Enter contact information to be sent appointment confirmation and reminders
